PROFESSIONAL SUMMARY

Currently pursuing an M.Sc. in Data Science with a foundation in Mathematics and hands-on experience in data analytics tools and machine learning techniques. Skilled in Python, SQL, Excel, Power BI, Tableau, and statistical analysis for transforming raw data into meaningful insights. Developed practical academic projects involving predictive modeling, data visualization, and recommendation systems. Ready to apply technical knowledge and analytical thinking in entry-level data analytics and business intelligence roles.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R, SQL

Analytics & Visualization: Power BI, Tableau, Advanced MS Excel (Pivot Tables, VLOOKUP, dashboards), MS Word

Core Concepts: Statistics & Probability, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, ETL basics, Machine Learning fundamentals, Business Intelligence reporting

EDUCATION

M.Sc. in Data Science (Pursuing, Final Year)

Expected 2027

C.P. and F.H. Shah Commerce College, Sardar Patel University

B.Sc. in Mathematics |CGPA: 6.61

Graduated 2022 – 2025

V.P. & R.P.T.P. Science College, Sardar Patel University

Higher Secondary (HSC) 12th | percentage : 62%

Gujarat Board,2022

Secondary School (SSC), 10th | percentage : 65.33%

Gujarat Board,2020

ACADEMIC PROJECTS

House Price Prediction | Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Cleaned and preprocessed a real-estate dataset, handling missing values and outliers before modeling to improve data quality for downstream analysis.
- Ran exploratory data analysis to identify the features most correlated with sale price, using correlation heatmaps and distribution plots to guide feature selection.
- Built and compared regression models (Linear Regression and Random Forest) to predict house prices, evaluating performance using RMSE and R-squared.

House Recommendation System | Python, Pandas, Scikit-learn

- Designed a content-based recommendation engine that suggests properties to users based on budget, location, and preferred amenities.
- Engineered similarity features from listing attributes and applied similarity scoring to rank and return the closest-matching houses for a given query.
- Structured the project pipeline into clear cleaning, feature-engineering, and recommendation stages for easier testing and future reuse.

CERTIFICATIONS

- Artificial Intelligence - [View Certificate](#)
- Power BI - [View Certificate](#)
- Power Query - [View Certificate](#)
- Data Analytics - [View Certificate](#)

SOFT SKILLS

Communication Skills, Problem-Solving, Critical Thinking, Teamwork

LANGUAGES

Hindi, English, Gujarati
